## Professional Experience

2025/02 – present

**Software Developer, OrionDev**

- Developed projects across diverse technologies: **Laravel, Livewire, Vue/Nuxt with TypeScript, and WinUI-3.**
- Built scalable applications with real-time data features, role-based security, and responsive UIs.
- **Mentored new developers**, guiding them through project workflows, code standards, and best practices.
- **Administered live production systems via cPanel**, handling phpMyAdmin database operations, monitoring application logs, executing production migrations, and configuring cron jobs to support automated workflows.

## Skills

**Front-End Development:** HTML, CSS, Tailwind, Vue, NuxtJs, TypeScript, React, WinUI-3

**Back-End Development:** Laravel, PHP, .Net Core, Java, C

**Other:** Git & GitHub, SQL, Test Driven Development (TDD), Unit Testing, **MVC & MVVM Patterns, Livewire**

## Key Projects

**Cellphone E-Commerce Frontend, A Vue (Nuxt) Typescript Application**

- Developed the frontend for a mobile and accessories e-commerce platform
- Implemented features including cart, wishlist, checkout, and order history.
- Oversaw project architecture, development standards, and team collaboration.

**Vape E-Commerce Project, A Vue (Nuxt) & Laravel E-Commerce Application**

- Built the backend and REST APIs for the Vue (Nuxt) application
- Implemented a flexible product and variant system with dynamic attributes
- Developed offer, cart, wishlist, checkout, and order management with full variant support

**Brokerage & Finance Project, A Vue/Nuxt & TypeScript Application**

- Contributed to a Vue/Nuxt application with distinct views for **clients, admins, and brokers**.
- Managed the **wallet, real and demo accounts**, including balances and account interactions.
- Implemented **real-time updates via APIs**.
- Improved **TypeScript typings** and refactored components for maintainability and scalability.

**Vape Sales Force Automation System, A Laravel Livewire Application**

- Built CMS + REST APIs for mobile app integration.
- Role/permission-based **user management (admins, employees, clients)**.
- **Reporting features**: employee activity, client engagement, **Google Maps API** (live tracking, routes, geolocation).

**FinShark Finance Personal Project, A React TypeScript & .Net Application**

- Stock portfolio manager with **financial analysis** (balance sheets, income statements, etc.).
- Authentication with **.Net Identity**; data persistence via **Entity Framework**.
- Enabled user collaboration with portfolio **comments and discussions**.

## Education

2024 – 2024

**The Odin Project**

Completed React front-end section (built multiple projects)

2020 – 2024

**Computer Science, Lebanese University**

Ranked in the top 10% in multiple coding-related courses at the Lebanese University

## Languages

- Arabic (Native)

- English (Fluent)
